

## CREDITS AND THIRD-PARTY SOFTWARE NOTICES AND INFORMATION

This software is based on or incorporates material from the files listed below (collectively, "Third Party Code"). **Please Note:** Microsoft is not the original author of the Third Party Code. The URL for the original file source, the original copyright notice and the license under which Microsoft received Third Party Code are set forth below together with the full text of such license. Such notices and license are provided solely for your information. Microsoft, not the third party, licenses this Third Party Code to you under the terms set forth in the Microsoft Software License Terms for the Microsoft Windows Software Development Kit for Windows 10 (the "Microsoft Program"). Unless applicable law gives you more rights, Microsoft reserves all other rights not expressly granted under this agreement, whether by implication, estoppel or otherwise.

The Microsoft Program includes files from certain third party software developed by their respective authors, as follows:

### BERKELEY YACC NOTICES AND INFORMATION BEGIN HERE

Upstream source <http://dickey.his.com/byacc/byacc.html>

=====

Berkeley Yacc is in the public domain; changes made to it by the current maintainer are likewise unrestricted. That applies to most of the files. A few files (currently those related to autoconf scripting) have other licenses as noted here.

Current byacc upstream maintainer: Thomas Dickey <[dickey@invisible-island.net](mailto:dickey@invisible-island.net)>

Public domain notice and no warranty:

-----

Berkeley Yacc is an LALR(1) parser generator. Berkeley Yacc has been made as compatible as possible with AT&T Yacc. Berkeley Yacc can accept any input specification that conforms to the AT&T Yacc documentation. Specifications that take advantage of undocumented features of AT&T Yacc will probably be rejected.

Berkeley Yacc is distributed with no warranty whatever. The code is certain to contain errors. Neither the author nor any contributor takes responsibility for any consequences of its use.

Berkeley Yacc is in the public domain. The data structures and algorithms used in Berkeley Yacc are all either taken from documents available to the general public or are inventions of the author. Anyone may freely distribute source or binary forms of Berkeley Yacc whether unchanged or modified. Distributors may charge whatever fees they can obtain for Berkeley Yacc. Programs generated by Berkeley Yacc may be distributed freely.

Please report bugs to

robert.corbett@eng.Sun.COM

Include a small example if possible. Please include the banner string from skeleton.c with the bug report. Do not expect rapid responses.
